

The Award Winning Product That Monitors and Manages Your Business Intelligence.

WHO OPENED AND CHANGED THE DATABASE?

WHY WERE THE DOMINO SECURITY SETTINGS CHANGED - WHO & WHEN?

WHAT PRECAUTIONS SHOULD I TAKE TO PROTECT MY COMPANY'S CONFIDENTIAL INFORMATION?

SecurTrac™
www.securtrac.com

SecurTrac™ is an add-on module that enhances the security of applications in the Domino environment. It is the only complete audit trail system that tracks the life-cycle of all objects, as well as all operational activities with real-time alert notification. SecurTrac™ simply is the best electronic information tracking system that meets any business needs.

SecurTrac™ Accountability

WHICH confidential database was accessed?

WHO accessed the information?

WHEN was it being accessed?

WHERE did it go?

Traceability

SecurTrac™ provides tracking of the life-cycle of e-mails, documents in databases, Domino Directories and Notes.ini in the Domino environment. SecurTrac™ provides real-time notification when changes occur within the Domino environment which greatly enhances internal security.

Anyone with auditing requirements in their applications or with interest in securing the flow of information due to regulatory requirements would be well served to evaluate and deploy SecurTrac™.

(April 2001, Lotus Advisor Magazine)

SecurTrac™

Highlights of SecurTrac™ Features & Functions

Database Monitoring

- * Logs document changes - **open/update/addition/deletion**
- * Logs design element changes

- * Logs content and/or last modified time changes of the Notes.ini file
- * Records all changes even if files are edited with an external editing tool
- * Displays changes as well as previous parameter values

Intrusion Monitoring

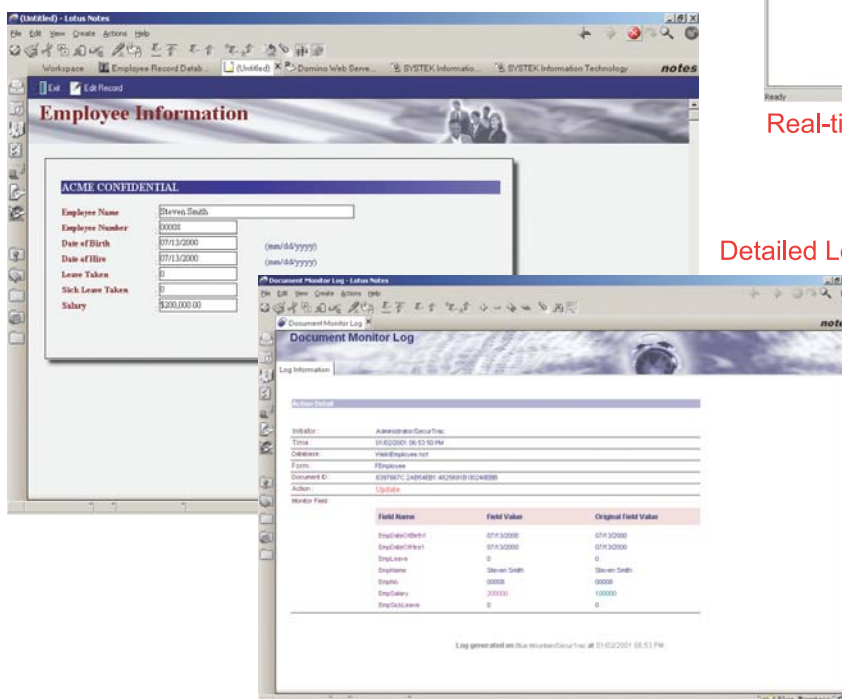

- * Logs and monitors occurrences of malicious events including illegal access to databases, illegal database creation, illegal server access, or access without authorized public key
- * Can be configured for user-defined events or pre-defined events

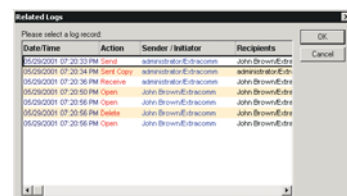

Easy Configuration

Real-time Monitoring

Detailed Logging Information

E-mail Life Cycle Tracking

The use of SecurTrac™ is beneficial to different levels of staff within an organization. It serves different intentions of tracking which enables staff in different positions to complete their task within a few clicks.

Management - Accountability

SecurTrac™ provides real time tracking of all events happening in the Domino server. SecurTrac™ can prevent misuse of information and leakage of confidential information. The use of SecurTrac™ makes it possible to hunt and be accountable for unauthorized attempts to access data or illegitimate actions.

Security Officer - Traceability

SecurTrac™ enables Security Officers to spot irregular movements of confidential information. A life-cycle tracking allows tracing of the flow of electronic information and e-mail activities instantly in the Domino environment.

Developer - Shorter Development Cycle

SecurTrac™ is a ready-made audit trail system which helps shorten the application development cycle immensely. With the deployment of SecurTrac™, developers are no longer required to write audit trail functions within Domino applications.

System Administrator - Instant E-mail Alert

SecurTrac™ enables easier management of Domino Directories for System Administrators. It tracks in real-time on all object changes under Domino environment. It secures the settings in Domino and prevents any unpredictable offenses by hackers.

Server

Hardware

- * Minimum 32MB memory in addition to the memory requirement for the Domino server
- * Minimum 50MB free disk space

Software

- * Windows NT4.0 / Windows 2000
(Other platforms will be supported soon)
- * Domino 4.6x or 5.0x

Administration Client

Software

Notes Client 5.0 or above
Microsoft Internet Explorer 4.0 or above
Netscape Navigator 4.5 or above
